SK

Sikkhona® model

It allows to measure team's health. All teams go through different stages when developing their trust and cohesion.

Sikkhona Team Assessment® objectively measures the level of trust and cohesion of the team, based on a series of behaviors that are evaluated by its own members.

This information is necessary to analyze the team's strengths and areas for improvement and, define the appropriate strategies to grow in cohesion and trust, and become a high-performance teams.

The model has been validated by the Department of Applied Statistics of the Autonomous University of Barcelona and has been used by more than 400 organizations from more than 20 countries.

Sikkhona Team Assessment® report

It is a simple, intuitive and universal online questionnaire that offers a diagnosis of the stadium where the team is at that moment, from the perspective of its members. The report details effective team behaviors as well as their derailments. In this way you will have a clear x-ray of its strengths and potential areas for improvement.

Program contents

- Deepening on the Sikkhona® model and the stages of team development (expression, alignment, interdependence).
- Model Specific Applications:
  - Use of the Report.
  - Strategies for working with different types of teams.
